YES, STEEL CAN BE SEXY

- Whoever said steel isn't interesting or an attention getter is wrong. Albina has been crafting steel to exceed customer requirements for over seven decades. The most fulfilling project is the one that is seemingly impossible, yet our amazing staff is confident that we can do it- and we do!
- Never shy away from a project that has difficult curved members because you are unsure who will be able to meet your expectations. Albina is always up to the challenge. By teaming with Albina on your next architectural project, you will be rewarded with bends that consistently meet or exceed your expectations.
- We will help you create that "signature" / "eye catching" piece that could help differentiate your company.
